The Titan 1500 Lift Makes Life Better!

After the holidays there are still plenty of special occasions that we all encounter. You will look for a gift for that special someone and wonder what to buy, that both male and female could want or use for all types of situations. Well I have found it!

Motorcycle accessories are not always things that go on the bike. Sometimes you need something that helps the work on their bike. The Titan 1500 XLT Lift is a sturdy, well built lift that fits in the category of accessories for the owner. Designed for the do-it-yourself mechanic, the small mechanic shop, or even the full professional garage or dealer. This lift isn't for the person who has limited space or for the one that just doesn't want to get down on their knees just to clean their bike. This lift is the one you need if you are working on your bike or up to 1500 lbs of ATV, lawnmower, or anything else you feel a need to wrench on. It is really a great lift for building your own chopper, too!

Last year I received a Titan Lift and have used it every single week. My son uses it to clean, work on, and service his bike and ATVs. My daughter and I use it to put the riding lawnmower on to clean and do general maintenance that it needs after use.

This 1,500 lb. lift gives you a large working platform to help you perform maintenance and repairs on your heavier ATVs, motorcycles, and other such vehicles. The Titan HDML-1500XLT lift is a great addition to any enthusiast's garage.

When it is all put together along with the side and front extensions, it measures 102 inches long and 52 inches wide. It is built with Heavy Duty 12 gauge steel, then powder coated for a durable finish. It also has built in retractable casters, so when you need to move it around on the concrete floor, it glides very well even when the motorcycle is loaded onto the lift. When the casters are up, the lift is firmly planted on the floor and will not move when you are working. There is a single hydraulic lifting cylinder, with accompanying dual function power unit; air or hydraulic foot-pump operation; and automatic safety locking mechanisms that prevent the lift from lowering until you are ready.

It comes with everything you need to start working right away. It has a front wheel vise that holds it securely in place; eye bolts to ratchet the bike down; all the extensions and ramps you need; and the air/hydraulic pump unit.

FEATURES

- Perfect for servicing motorcycles and ATV's
- Built-in retractable casters
- Lift can be moved when loaded
- Automatic safety locks
- Heavy 12-gauge steel construction
- Single hydraulic lifting cylinder
- Dual function power unit. Air or hydraulic foot-pump operation
- Powder coat finish
- Two rear wheel drop outs for back wheel maintenance

INCLUDES:

- Front Table Extension
- Side Extensions
- Standard Rear Wheel Drop Out
- Roller Plate Drop Out
- 3 Detachable Short Ramps
- Detachable Motorcycle Ramp
- Air/Hydraulic Pump Unit

Of course they have other lifts for other necessities in life too. They carry a nice selection for all your maintenance needs, such as the Motocross with 300 pound lift capacity; a 1000 pound capacity mini lift that raises the bike 16 inches great for tire maintenance; motorcycle dollies, chocks, ramps; ratchet straps and anything else you need for moving, lifting, working on your bike. They also take care of your needs for PWC, Automobiles, and ATV's

Getting just a little older every day has disadvantages. However the Titan Lift has been one of the greatest gifts I've ever received. The easiness of just "one step" to lift and lower any object allows no strain on the lower back. Another thing I really like is that it doesn't take up a lot of space in my garage, leaving more room to organize other items I have. I hope you will check into these lifts. There are so many sizes to choose from to fit your individual needs.

Did you notice that all the operative words are "NEED"? Check them out; you will be glad you did: TitanLifts.com.
